FloatStep Dock Ladders

Wide 2" and 4" slip-resistant steps.
Adapts to virtually any dock system.
High quality track system prevents binding.
Removes easily from dock and attachment bracket.
Concealed track system guards against pinch points.
Affordable, cost-effective safety ladder for marinas.
Patent-pending design is compact and saves space.
Fabricated with industry standard 6000 series aluminum.
Durable molded plastic float with a buoyancy control valve.
All TIG welded construction for strength, durability and attractive finish.
Provides safe access at any water level, tide or dock height/ freeboard.
Remains out of the water when not in use, reducing electrolysis, corrosion and marine growth.

Material

6061 T6 & 6063 T52 aluminum

Weld Type

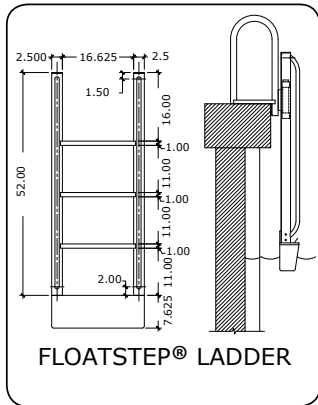

TIG

Powder Coating

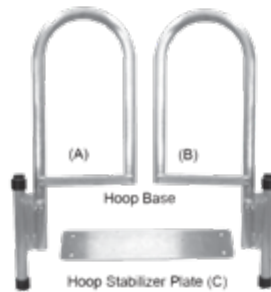

Optional

We are the exclusive manufacturer of the award-winning, patent-pending FloatStep® Dock Ladder.

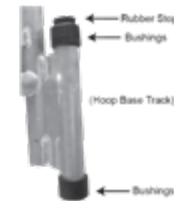

What is FloatStep

Atlantic Aluminum & Marine Products manufactures different models of aluminum dock ladders for marinas and the marine construction industry and there are other styles available elsewhere. However, none can match the unparalleled safety features of FloatStep® dock safety ladder. Please view our site in its entirety to find out why the award winning, patent pending, FloatStep® dock safety ladders are the best! More and more marinas, marine contractors, municipalities and waterfront residences are turning to the FloatStep® dock safety ladders for their choice.

Buoyancy Control Valve (F) located on the backside of the float near the bottom.

SUP, Kayak and Surfboard Racks

Features

- All-weather indoor/outdoor application.
- All-weather cork pad prevents scratching.
- Provides efficient use of limited space.
- Easily mounts to any wall type.
- 5 year warranty on material construction.
- Custom designs and applications available.
- Racks come in White, Black and Bahama Blue. Custom colors available.
- Kayak racks are designed with bungee eyes for securing/locking.
- SUP display racks feature paddle holder.
- Corrosion-resistant materials and TIG welded construction.
- 1 year limited warranty on chipping and gloss retention of powder coating.

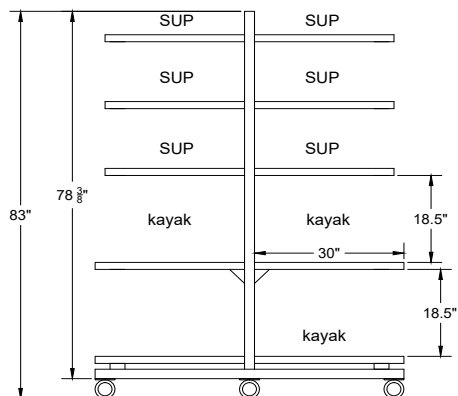

Kayak Racks

These kayak shack racks are not only weather resistant but lockable. Now your kayak can be stored either indoors or out and give you more space and some peace of mind.

Combination Free Standing SUP & Kayak Rack

Aluminum Ramps & Gangways

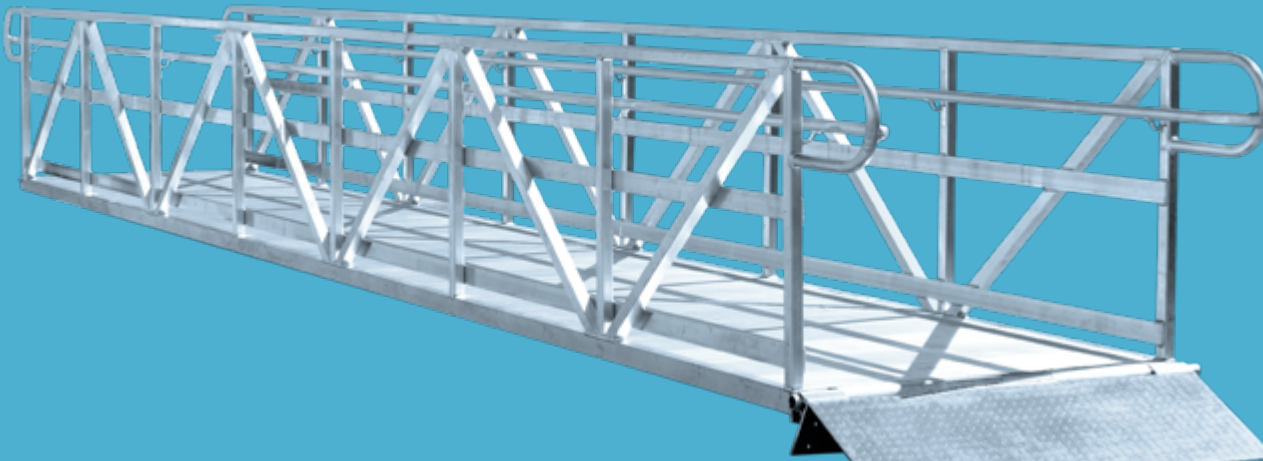

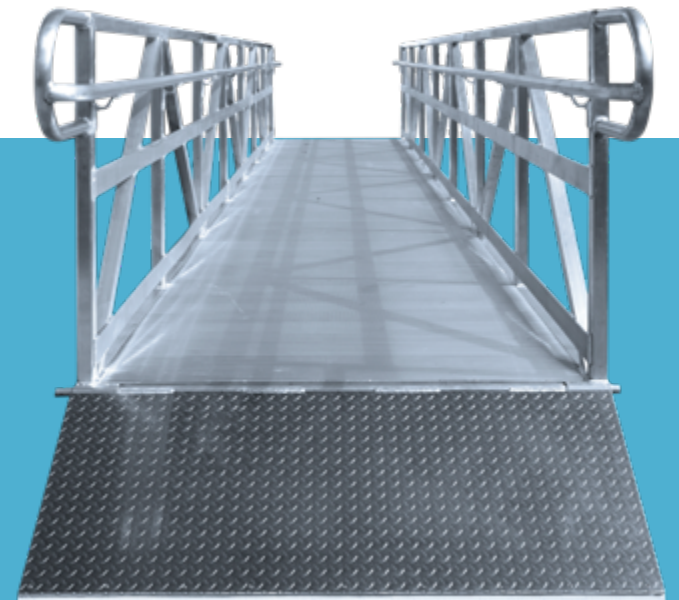

Features

- Built primarily for floating dock access in marinas, parks and residential waterfronts.
- Custom applications for canoe and kayak launching docks.
- Fabricated with industry standard 6000 series aluminum.
- Options include full length piano hinge, truss type handrails, and ADA compliance.
- All TIG welded construction for strength, durability and an attractive finish.
- More welds than our competition for added strength and safety.
- Standard and custom sizes available.

Applications

- Floating dock access ramps for marinas.
- Vessel boarding ramps.
- Access ramps for kayak and canoe launch.
- ADA access ramps.
- Dune walkover and beach access ramps.

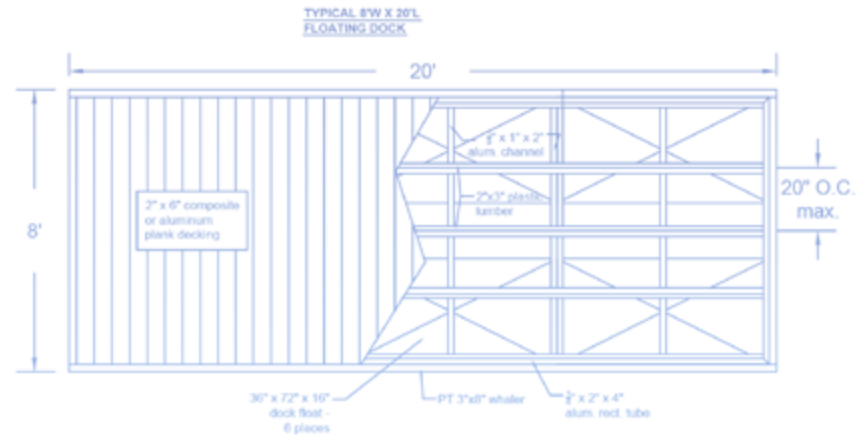

Atlantic Aluminum & Marine Products manufactures aluminum ramps and gangways for marine and ADA access applications. Ramps provide access for recreational and commercial activities along various waterfront locales. AA&MP's aluminum ramps can be custom designed to fit virtually any environment. Atlantic Aluminum & Marine Products has worked for years in South Florida with local marine contractors, general contractors and other marine construction professionals in designing and building aluminum marine products to help their customers with safe access.

Frames, Decks & Docks

Features

- In-house CAD design capabilities.
- Attractive, corrosion-resistant, long lasting finishes.
- Built to local, state and federal codes.

AAM builds aluminum structures for a multitude of applications for the marine and general construction industries including dock frames, walkways, platforms, stairways, and walkovers, etc.

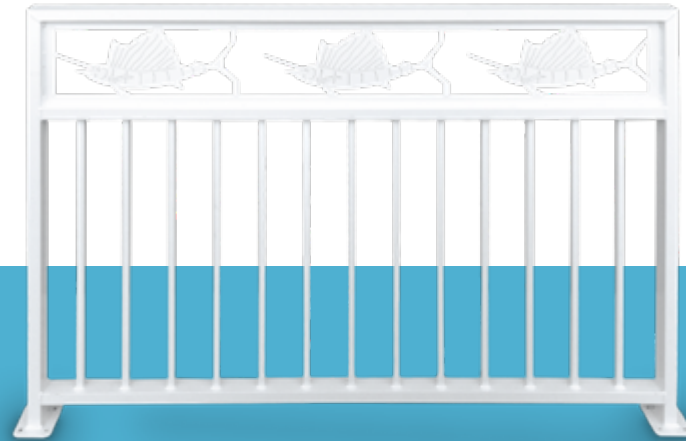

PRICING VARIES BASED ON MODEL, APPLICATION AND OPTIONS. PLEASE CALL US FOR PRICING.

Aluminum Handrails & Railings

Features

- All TIG welded construction for strength, durability and an attractive finish.
- Adaptable to various dock systems, ramps, gangways, walkways, stairs, steps.
- Fabricated with Industry standard 6000 series aluminum.
- Standard schedule 40 pipe with optional schedule 80 pipe.
- Custom design and fabrications available upon request.
- Available in anodized or powder-coated finishes.
- ADA compliance where applicable.
- DOT railings available – build to order.

Atlantic Aluminum & Marine Products manufactures aluminum railings for virtually any application. Florida building codes for railings and handrails are similar to the Americans with Disabilities Act (ADA). The codes maintain accessibility standards for all people and are required for all public and private buildings used for business. Railings are required when the elevation change exceeds 30". Handrails and railings are often required for marine applications as well.

TIG welded aluminum railings and handrails for ramps, stairs, walkways, platforms, docks, decks and more.

Safe access and ADA compliance

Marine Accessories

Dock Boxes

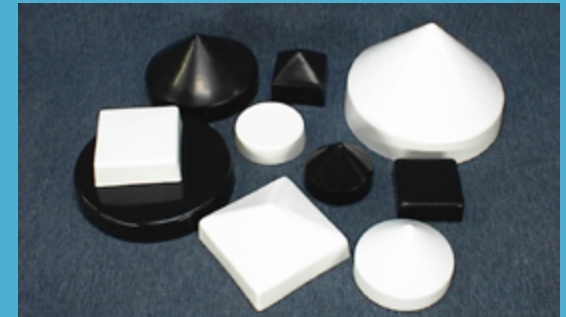

- Molded, hand laid and rolled out fiberglass construction.
- Snow white gel coat inside and out.
- Stainless steel hinges, lid cable and hasps

S Cleats

- Made of high quality, durable cast aluminum alloy.
- Smooth finish prevents boat or dock line chafing.
- Four standard sizes - 10", 12", 15" and 18".
- Accepts up to 1/2" diameter bolts for installation.
- Easily installs on wood or concrete deck surfaces or dock pilings.
- Recessed mounting holes.

Dock & Mooring Pile Caps

- Cone shaped piling caps keep birds from roosting.
- Prevents moisture from working down through the inside of the piling and rotting from the inside out.
- Round pile caps are available in black or white; cone or flat and in 1/2" increments from 6" - 18".
- Square caps are available in black or white; cone or flat and in either 10" or 12" sizes.
